Year 4 Circuits workshop
Wednesday 21st November 2018

Dear Parents and Carers,

Today, your child has taken part in an exciting workshop on circuits which we were offered at the last minute - it was too good an opportunity to miss! Students experimented with completing circuits and using the circuit to create power. This exciting circuit workshop is linked to our topic this term, *'What have machines done for us?'* Students have had the opportunity to learn how to create circuits using different components.

Parents are asked to make a voluntary contribution of **£4.10** towards the cost of this workshop.

Please make your payment via **Parent Pay as soon as possible** and complete / return the slip below.

Thank you,

Miss Kowalchuk, Mr Bowerbank and Miss Dispasquale
